Product specifics

GSE In-Roof System is an in-roof integrated PV system for traditional photovoltaic panels on pitched roofs from 12 degrees to 50 degrees.

The main features are: Easy to install and quick to mount (a 3 to 5 kW system installed in 6 hours); Lightweight (2 to 3 kg) and easy to transport; Completely Waterproof : the systems ensures a complete watertightness of the PV System (the water flows under the module's surface); Flexible: it allows to achieve any desired configuration type (landscape, portrait, U-Shape, Pyramid, etc.) on any roof type; Shock Resistant and Climate Resistant (from -30°C to 100°C); Fits 95% of the existing PV modules; 100% Recyclable; Low-cost. Different sizes are available, in black and silver colour.

This integration system has: CEIAB Certified in France, CSTB Certification ATEC N°21/16-57, certification for fire tests and Certisolis certification.
