BiPV 2-11

Product	BiPV 2-11
Producer / CH supplier	Schletter GmbH
Address	Alustraße 1 D-83527 Kirchdorf/ Haag i.OB
Contact	Tel: +49 8072 9191 495 Fax: +49 8072 9191 9495 Mail: anfrage@schletter.de Web: www.schletter.de

Product specifics

The new Schletter BiPV 2-11 combines in a special kind of sealed overlap, the reliability and tightness of a conventional roofing with photovoltaic. The assembly is economical and easy accomplished by PV installers. The system was developed for frameless modules with a thickness of 4 to 8 mm and is thought for pitched roofs with a slope of minimum 15°. Lower roof pitches are possible with additional measures. The modular design and the almost infinite expansion capability allows the use from small plants in tile roofs until industrial roof-connected systems.

Fastening of modules on the roof battens
