Solar Tiles

SolarStone

Product	SolarStone
Producer / CH supplier	Solarstone Std
Address	Tartu Str. 16 Viljandi 71004 - Estonia
Contact	Tel: +37 258 830 500 Mob: - Mail : mattis@solarstone.ee Web: http://www.solarstone.ee

Product specifics

SolarStone is a photovoltaic tile composed of 22 monocrystalline cells. These BiPV panels interlock perfectly with any type of roof tiles and are installed directly onto wooden batten without any costly fittings or mounts. SolarStone combines a modern design with a practical mounting system. It can be used in both existing roofs and new buildings. Its aesthetical pleasing design makes it particularly suitable for those buildings where regular modules are not accepted. The PV modules are supplied with a 10 year warranty for defects.

Technology:	Monocrystalline
Power [W]:	109
Size [mm] L, w, t:	1800 x 420 x 22-25-30
Specific power [W/m²]:	144
Price [€/m²]:	255 (cost of the PV plant, excluding VAT, valid in Estonia, 2016)
Module weight [Kg]:	11
Specific weight [Kg/m²]:	14.5
Min. tilt:	-
Custom made:	Cells colour, frame colour
Certifications:	-
