Solar shadings

Schüco-Prosol

Product	Schüco-Prosol
Producer / CH supplier	Schüco
Address	Jansen AG Industriestrasse 34 CH- 9463 Oberriet
Contact	Tel: +41 71 763 95 23 Fax: +41 71 761 27 38 Mail : solar@jansen.com Web: www.jansen.com www.schueco.eu

Product specifics

High quality glazing is available in a wide choice of sizes, formats and finishes, from simple glass/Tedlar combinations to designs with double glazing, sound insulation or safety glass.

When integrated in canopy constructions above windows, entrance areas or patios, they provide solar shading, protection against rain and snow, and valuable electricity to boot. Installation at an optimum angle of 30°-45° and rear ventilation for construction reasons makes for a high degree of solar efficiency.

Technology:	Monocrystalline, multicrystalline, thin film (a-Si)
Power [W]:	Depends on the choice of the module
Size [mm] L, w, t:	500-3000 x 500-2000 (curves are possible)
Specific power [W/m²]:	Depends on the choice of the module
Price [CHF/m²]:	n.d.
Module weight [Kg]:	Depends on the choice of the module
Specific weight [Kg/m²]:	Depends on the choice of the module
Min. tilt:	n.d.
Custom made:	Dimensions, form (curves)
Certifications:	IEC 61215, IEC 61646, IEC 61730
