Product specifics

Fixed sun shading for façade and roof.

Solar Louvres help minimize glare and overheating caused by excessive “solar gain” whilst generating electricity.

Louvres are ideally situated to capture solar energy; solar louvres can reduce building energy use and contribute to the electricity demand of the building at the same time.

Technology:	Monocrystalline
Power [W]:	> 10000
Size [mm] L, w, t:	Dependent on system size
Specific power [W/m²]:	Dependent on system size
Price [CHF/m²]:	n.d.
Module weight [Kg]:	Dependent on system size
Specific weight [Kg/m²]:	Dependent on system size
Min. tilt:	n.d.
Custom made:	Dimensions
Certifications:	IEC61215, IEC61730
